

Need help finding your serial number? Check out below.

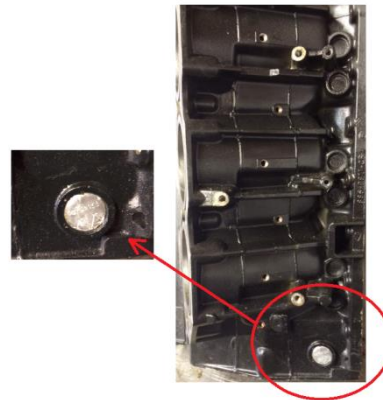

MERCURY OUTBOARDS:

For Mercury outboards, the serial number most of the time is located on the transom bracket as shown in Figure-1 below. However sometimes this gets worn off. You can also locate your serial number by taking off the engine cover and looking on the lower area of the power head for a quarter sized silver metal circle as shown below right in Figure-2:

ON THE ENGINE – Figure 1

ON THE POWER HEAD – Figure 2

MERCUISER INBOARDS:

You can locate the MerCruiser serial number for most numbers on the top of the engine when you open the access cover as shown below left in Figure-3. On some older MerCruiser engines the label may be located on either side of the engine as shown in Figure-4:

MOST MERCUISER ENGINE – Figure 3

OLDER MODLE ENGINES – Figure 4
